

## Volunteer for Research at Vanderbilt

We invite 6-14 year old children with autism or typical development to be part of our research about how children play together!

Participation involves visits to the Vanderbilt Kennedy Center:

1. Psychological Testing (1-2 hours), get \$20
2. Social Interaction or play! (1 hour), get \$20

There are also 3 additional optional visits of 1-2 hours each. All participants may not qualify for all research activities.

A great way to learn about science and help other kids!
